

American Tank & Vessel - The Digester Replacement Option

If you are considering a weld overlay on your digesters, you might be surprised to know that **AMERICAN TANK & VESSEL** can often replace your digesters for the same amount of money and, in most cases, in a shorter amount of time.

You are in the business of production and you don't have time for delays. This is why we specialize in quick digester replacement during your shutdown periods and fast-track schedules.

AMERICAN TANK & VESSEL has developed a streamlined, systematic approach to digester replacement. AT&V can often provide a new vessel in the time it would take to overlay your old digester--minimizing your down time for replacement work.

Replacing your digester gives you the latest, state-of-the-art product and can also help increase your digester volume and pulp capacity. **AMERICAN TANK & VESSEL's** engineers will work with you to provide the most effective solutions for your company's digester needs.

The proof of **AMERICAN TANK & VESSEL's** Replacement Option is in its field-tested success stories. Let us show you how we have helped other companies save time and money by making the replacement decision.

The next time you are considering digester repair by weld overlay, call **AMERICAN TANK & VESSEL** and let us discuss the Replacement Option.
